

CITATIONS/JUDGE - Citation Tracking and Court Docketing System

CITATIONS/JUDGE is an on-line, interactive citation tracking and court docketing system. CITATIONS/JUDGE integrates with the CISCO records management system, the JUDGE. A variety of reports provides accurate and timely information for effective tracking and management analysis. English language menus and prompts make CITATIONS/JUDGE an easy-to-use system for non-technical personnel. Data entry is simple, with a logical flow of fill-in-the-blank data fields.

CITATIONS/JUDGE has separate modules to handle PARKING TICKET and MOVING VIOLATIONS records.

MAINTENANCE - The Maintenance menu provides three data entry functions: Add New Records, Change Records, Delete Records. Moving citation number, name, address, personal security number, citation type and date information. Parking tickets data include violation, location/additional information, description, parking meter #, fine amount and status.

Violations provides data capture for agency, descriptors, driver's license information, social issued, type of violation and location/additional agency, date and time issued, citation type, grid, officer, vehicle license plate data, vehicle

The Change/Inquire function allows individual records to be recalled and altered. All data elements can be changed, except for the key fields that identify the record within the system.

Individual records can be deleted. The record must be recalled and verified before being deleted, which prevents the accidental loss of necessary records.

INQUIRY - Through this function, the user can search for records using key data elements such as name, location, license tag, citation number, or report number. The system will generate a complete list, within a specified date range, of all records in which the key field occurs.

REPORTS - CITATIONS/JUDGE provides seventeen pre-programmed reports that can be printed immediately or stored for later viewing or printing through Process Selected Listing.

TRAFFIC CITATION/LOCATION SUMMARY - This report provides Location Summary information on all citations issued specified within the date range. Information supplied is citation number and suffix, date of occurrence, location where violation occurred, description of violation, grid and day of week.
